

TELEMEDICINE FOR PATIENTS:

Make the most
of your time

Meet your
doctor online

Simple and convenient to use

See your doctor from anywhere, just click their personalized room link (like [doxy.me/YourDrsName](#)) to join them for a video call.

No downloads or accounts

No need to download software or create an account. Just use a browser on a computer or device with a camera and microphone.

Do I need to sign up for an account?

No, as a patient you actually don't need to create an account with us to see your provider. You can simply go to your providers url ([doxy.me/YourDrsName](#)). You will check in and your provider will start the call when they are ready.

Is this secure?

All data is encrypted, patient sessions are anonymous (we don't know who you are) and no patient info is stored persistently. We use the AES cipher with 128-bit keys to encrypt audio/video, and HMAC-SHA1 to verify data integrity.
